Kinderland

# Coronaprotocol Kinderland

The following protocol shows the actions Stichting Kinderland Amstelveen is taking. Always follow the basic rules set up by the government.

*You can review the basic rules at [government.nl/coronavirus](https://www.government.nl/coronavirus)*

✓ So long as the government doesn't change the basic rules, Kinderland will take place.

## Symptoms

Stay at home

all Kinderland and get tested

### Hygiene measures

Provide your child with a facemask. Facemasks are mandatory in buses.

We always carry disinfectant.

We only provide water. Please make sure your child(ren) have lunch with them every day.

We regularly clean the toilets. We'll provide paper towels for the drying of hands.

We clean all materials after use.

### Information for parents

We request that you keep visits to family and friends to an absolute minimum during Kinderland. We ask you this to minimize the risks during camp.

Parents are not allowed on the Kinderland playground. This playground has been cordoned off with fences and will also be marked with signs.

*If it is necessary to enter the playground or building, you may only do so after approval of one of our volunteers.*

### Healthcheck

Upon arrival we'll do a healthcheck with every child. If your child has symptoms, we'll decide whether your child is fit to attend camp that day. Should we decide that your child cannot stay, then it'll have to be tested at the GGD. Only after a negative test as well as your child no longer showing symptoms, will your child be allowed to attend again. A selftest does not suffice.

Should we notice symptoms during the day, your child will be isolated from the group. We'll contact you to have your child picked up as soon as possible. During isolation we'll do everything possible to make this as pleasant as can be for your child.

*Should your child test positive, please inform us as soon as possible. The phonenumber you can reach us on can be found at the bottom of this protocol.*

### Further measures

- Our volunteers keep a distance of at least 1.5 meters to every child in groups I and J. Our volunteers also keep this distance between each other.
- In case anyone at camp tests positive, we'll always contact the GGD. We will always follow the advice they give us.
- All third parties visiting us during camp will be asked to take a selftest before starting their activities. In case they show symptoms they will not be allowed to attend our camp.
- During camp we will ventilate all rooms as much as possible.

### Symptoms

Stay at home

Call Kinderland and get tested

Was vaak je handen

Hoest en nies in je elleboog

Draag een mondkapje indien nodig

Telefoonnummer:  
06-47202018  
(alleen tijdens kamp)

**alleen samen krijgen we  
corona onder controle**
